Vivek Mani

Analytics Engineer | Data Engineering & BI Specialist

9920566657 | Vivekmani28@gmail.com | github.com/viv3kmani | Passport: Yes | Visa Status: Indian

Synopsis

Experienced Analytics Engineer with 12+ Years of experience and expertise in data transformation, modeling, and automation. Proficient in Power BI, Microsoft Fabric, Snowflake, and DBT, with a strong background in designing scalable data architectures and optimizing data workflows. Skilled in automating reporting pipelines, architecting data solutions, and enhancing data reliability for business intelligence applications.

Certifications

Certification	Issuing Organization	Year
Snowflake Advanced Data Engineering	Snowflake	2026
DBT Fundamentals	dbt Labs	2026
Snow Pro Core	Snowflake	2024
Certified Microsoft Fabric	Microsoft	2024
Microsoft DA-100	Microsoft	2022
DOMO Editor	DOMO	2019
DOMO Master	DOMO	2019

Technical Skills

BI & Analytics Tools
- Power BI
- Microsoft Fabric
- DOMO

Data Transformation & Modeling
- SQL
- Snowflake
- Semantic Models
- Star Schema

Data Engineering & Pipelines
- ETL/ELT Pipelines
- Fabric Data Pipelines
- Deployment Pipelines
- Data Modeling

Development & Tools
- Python
- Git
- Docker
- Tabular Editor
- DBT

Experience Summary

- ✓ **Enterprise-Scale Analytics:** Led analytics for a global QSR chain spanning 13 BMUs, 78 countries, 16,721 stores, and $22B+ revenue.
- ✓ **Microsoft Fabric & Power BI:** Expertise in Fabric Data Pipelines, Deployment Pipelines, Semantic Link, lakehouses, and Power BI development.
- ✓ **QA Automation & Tooling:** Developed Python-based tools for Power BI metadata extraction and report validation, improving QA efficiency.
- ✓ **Best Practice Implementation:** Implemented BPA rules using Tabular Editor with global tracking systems for modeling standards compliance.
- ✓ **Dashboard & BI Migration:** Migrated 40+ dashboards from DOMO to Power BI, leading to cost savings and enhanced analytics capabilities.
- ✓ **Data Transformation & Automation:** Automated manual reporting processes, eliminating ~6000 manual reports/month for AT&T.
- ✓ **AI & Copilot Integration:** Conducted POCs for Microsoft Copilot integration with Power BI at global scale.

Professional Experience

Softcrylic by Hexaware Tech Ltd. — Dec 2022 – Present

Lead - Data Science and Analytics | Global QSR Chain

- Led analytics initiatives for a global QSR chain spanning **13 Business Market Units, 78 countries, 16,721 stores, and over $22 billion in revenue**.
- Designed a scalable, cost-efficient, and user-friendly centralized reporting system using Microsoft Fabric.
- Developed **OPS KPI Analytics solution** to analyze the relationship between operational KPIs and Same Store Transaction Growth (SSTG). Implemented store-level data imputation, Z-score normalization, and linear regression to derive coefficients. Built a dynamic **What-If Analysis** tool in Power BI enabling users to simulate how changes in 14 different OPS KPIs across market tiers impact SSTG.
- Developed a **Python-based QA Helper Tool** to scan Power BI project folders (.pbix), extract metadata (page visibility, bookmarks, perspectives, measures), and output to Excel for efficient report validation.
- Built comprehensive **Fabric Data Pipelines** for ETL processes across DEV, QA, and PROD environments with Deployment Pipelines for seamless artifact promotion.
- Leveraged **Fabric Semantic Link** with notebooks to execute rebinding commands, ensuring semantic models synchronize with correct warehouses per environment.
- Conducted **Proof of Concept for Microsoft Copilot** integration with Power BI to assess effort and processes for global-scale implementation.
- Implemented **Power BI Best Practice Analyzer (BPA) rules** using Tabular Editor, with a global tracking system via Fabric notebooks and lakehouses.
- Developed **BOGO (Buy One Get One) and Upsell** reporting logic through deep-dive analysis of product-level transaction data, identifying sales patterns and defining classification rules in **SQL and DAX**.
- Provided version control POC demonstrating Git integration with Power BI for multi-developer collaboration and change tracking.
- Identified and resolved tooling and architecture issues in third-party developed DOMO BI dashboards.
- Optimized reporting granularity, reducing inflated data storage and compute costs.
- Streamlined ETL processes for handling large datasets (~8 billion rows) using Snowflake.

Sutherland Global Services — Oct 2021 – Dec 2022

Associate Manager & Technical Architect – BI Development

- Managed BI and data transformation projects, ensuring scalable and efficient data workflows.
- Managed **Power BI Premium capacity** for the organization, ensuring optimal performance and resource allocation.
- Implemented **Power BI Dataflows** as the primary data transformation tool, standardizing ETL processes across teams.
- Liaised with **Power BI Support** to optimize dataflow performance by identifying and reporting product gaps.
- Developed and published a **Best Practices Guide** for developers on Power BI data modeling and dashboard development standards.
- Led a team of 4 and supported 12 developers in building data-driven analytics solutions.

Sutherland Global Services — Jan 2020 – Oct 2021

Lead Data Analyst

- Automated manual reporting for AT&T, eliminating ~6000 manual reports per month.
- Built client-facing dashboards for Disney+, ESPN+, NHL Electric AI, and AOFL.
- Migrated 40+ dashboards from DOMO to Power BI, enhancing self-service analytics.

Sutherland Global Services — Apr 2018 – Jan 2020

Senior Associate – Reporting & Analytical Services

- Promoted based on performance rating of 4/5.
- Developed and optimized BI reporting solutions using DOMO.

Sutherland Global Services — April 2016 – Apr 2018

Associate – Reporting & Analytical Services

- Joined Reporting and Analytics through an IJP
- Automated Excel-based reporting processes, using tools like VBA and macros, MS Access

Sutherland Global Services — Sep 2013 – Apr 2016

Associate – Customer Service

- Handled Tech support for AT&T Uverse customers

Education

Bachelor of Computer Applications
Chandigarh University
